

LegalSolutions

WHEN COMMUNICATION REALLY MATTERS...

A law firm's daily communications needs are complex and varied. Conferencing with clients, planning with deal and trial teams, conducting depositions or regular firm-wide meetings require secure, reliable and convenient communications. Premiere Conferencing addresses these needs with Legal Solutions, a tailored package that provides innovative audio and Web conferencing services.

From attorneys and legal assistants to office managers and technology directors, Legal Solutions benefits everyone in your law firm:

Dedicated Legal Team. A dedicated Legal Industry support team – available at the touch of a button to assist you anytime, 24/7.

Customized Billing. Client and matter numbers are captured, allowing you to track costs and bill back to the appropriate client.

Full Range of Services. Hold small client meetings or conduct high-profile Continuing Legal Education seminars with our automated, operator-assisted and Web-related products.

Enhanced Security. Hold private discussions with your clients and confer with other attorneys in your firm about confidential matters using high-level security features.

Global Reach. Minimize travel time and costs by communicating with your office or clients around the globe with our worldwide industry-leading automated conferencing services.

Providing conferencing solutions is our sole focus. And, just as you continually investigate new ways to help your clients succeed, Premiere Conferencing continues to refine and enhance our technologies to ensure you have the most innovative conferencing services available.

PremiereConferencing

ReadyConference® *Plus* for the legal profession

ReadyConference® Plus is an integrated, on-demand meeting tool that allows you to conduct convenient and cost-effective meetings with the audio and Web features you need most. Whenever or wherever the need arises, the power to bring together business associates around the world – or across town is at your fingertips.

Dedicated dial-in number, passcode, and Web link: A dedicated dial-in number, passcode and Web link are provided for anytime, anywhere access to ReadyConference® Plus.

Easy to use: ReadyConference® Plus requires no complex training and is the most intuitive audio and Web conferencing tool available. Manage your entire meeting through a touchtone phone or through audio controls via the ReadyConference® Plus Web interface. You can also capture the client matter number using either method.

Cost Effective: ReadyConference® Plus offers a low per-minute rate and you pay only for the minutes you use. Separate price for Web and audio, allows you to use one or both.

24/7 Customer Support: When you need assistance, Premiere Conferencing's award winning customer service is available at anytime by pressing *0.

Add Visuals on Demand: ReadyConference® Plus supports full PowerPoint® functions and gives you the ability to incorporate audio and video.

Uploading Presentations Is Easy: Access and store numerous presentations from your own online library.

Providing conferencing solutions is our sole focus. And, just as you continually investigate new ways to help your clients succeed, Premiere Conferencing continues to refine and enhance our technologies to ensure you have the most innovative conferencing services available.

Collaborate On Documents with Web-based ReadyCastSM.

Ideal for small, interactive meetings such as negotiations, agreement redlining and document production, ReadyCast offers the ability to add visual presentations, white board, conduct Web tours, share applications and engage in team collaboration in conjunction with your automated ReadyConference. And because you set up and conduct the audio and visual portions of your meetings, you are in complete control of your conference.

Manage And Monitor Your Conference Online with ReadyClick & ConferenceSM, a Convenient Web Software

ReadyClick & Conference adds an additional layer of security to your conference with these moderator-only features:

- You can dial out to and add only those participants you want on the call, then lock the conference to prevent additional participants from joining.
- You can identify attendees as they enter the conference, instantly disconnect any unwanted participants and "drag and drop" participants into private sub-conferences.
- An instant messenger pop-up window notifies you anytime the conference "room" is being accessed.

What Else Can Premiere Conferencing Offer You?

Premiere Conferencing also offers a host of operator-assisted and Web services for high-profile meetings and Web collaboration events.
