Legend

*1 - Web Dialogs is now known as "IBM Sametime Unyte"

*2 - Recording occurs on the hosted service, not the moderators personal computer. No special equipment (e.g. soundcard, phone audio adapter) required.

*3 - Detailed post meeting log contains: participant join/exit time, chat transcript, app sharing time schedule, Q&A, polling questions

*4 - Each company gets their own unique Conferencing Hub with a URL prefix of their choice (e.g. <http://acme.premiereglobal.com>)

Netspoke Pro Key Competitive Differentiators

1) Conferencing Hub

- company specific Hubs and URLs
- extensive admin features of managing moderators, branding, and access
- secure, shared content between moderators in a Hub
- public version of Hub for easy, secure access to trainings, sales meetings, and webinars

2) Ease of use, yet powerful and extensive pre, in and post meeting features

- no software client download
- easy to navigate buttons
- contextual help, extensive user guide, FAQs
- one web collaboration tool that supports small team meetings or webinars up to 125 participants

3) Live Help

- industry first to market Live Chat Help for web collaboration

4) Advanced audio integration

- full support for global conferencing (display of local dial-in numbers in both email invites and live interface)
- advanced audio controls (active talker, auto merge of audio and web presence, dial-out, mute individual/all, individual volume control)
